

Ephemeris Absoluta.

A N

ALMANACK

{ ASTRONOMICAL,
ASTROLOGICAL,
METEOROLOGICAL, }

For the Year of our Lord God, 1690.

And from the World's Creation, 5639.

Being the second after *Bissextile*, or Leap-Year.

Wherein is contain'd

The Motions of the *Planets*, *Mutual* and *Lunar Aspects*; a Table of Houses, *Eclipses*, *Monthly Observations*; a Table of the Tides; the Rising and Setting of the *Sun* and *Moon*; *Lunations*; the *Moon's* Southing; the *Terms*, and their Returns: With several useful Tables, and other Requisites fitting such a Subject. Accommodated and referred properly to the Meridian of the Honourable City of *London*, whose *Zenith*, or Vertical Point, is distant from the *Aequator* Northward 51 deg. 32 min. Yet it may indifferently serve any part of *England*, *Scotland*, *Wales*, and *Ireland*.

By **DANIEL WOODWARD.**

Student in *Physick* and *Astrology*, living at the Sign of the *Globe* in *Arundel-Buildings* by *St. Clement's Church* in the *Strand*, *London*.

Scientia est hominis, praescientia solius Dei.

LONDON, Printed by J. D. for the Company of
STATIONERS. 1690.

Kind Reader;

THE Method of the last Year being kindly accepted, hath continued a continual Progression of my Intention and Promise, viz. Annually to present the World with a domifying Table, the Meridional Places, both Mutual and Lunar Configurations of the Coelestial Wanderers, for the Longitude and Ellevation of the August and Famous City of LONDON, England's Metropolis, that this annual Mnnuel may be rendred a Compleat Ephemeris, and obsequious for all my Country-men, as well the Horary Astrologian, as others nescious of things Mathematical, but impossible est placere omnibus. And that this may prove the more acceptable, I have in this Revolution adventured on the Publication of some modest Mensurnal Observations Astrological (partly to oblige those that expect them, and partly because it's common and usual) seeing (that by the wonderful Providence, and ineffable Goodness of the Almighty God) we have so fair and glorious a prospect of a total Deliverance of Popery and Arbitrary Power, not only in the Kingdom of England, but also in the Kingdoms of Scotland and Ireland, by which (O nos felices!) the Honour, Glory, and Dignity of the Imperial Crown of the Realm will be advanced, our Government both in Church and State inviolated, the Laws of Rome as well as her Religion, not intraduced; the Pride and Ambition of the French Monarch lessened, and the Romish Party perplex'd to behold the Product of so many Years clandestine Conspiracies, hurried as it were off the Theater in a moment without hopes of Resurrection: Nihil fit in reum Naturâ sine Divina Providentiâ. Good Lord! What Endeavours and secret Conspiracies have been carried on by the Papists in this Kingdom of England (the only Bulwark of the Protestant Religion) almost ever since the Reformation, but especially of late Years, viz. since 1672. to propagate the Romish Religion and supplant the Protestant, but all their Jesuitical Plots and Contrivances have proved abortive, and the Subversion and total Destruction of some of their Adherents. And tho Providence hath so miraculously delivered this Nation (which was once in such a Cachexia) from a Diluvium of Evils, that would have been the Consequence of such Tyrannical Encroachments inundating the whole Kingdom, yea, and also her Neighbouring or Adjacent Territories (tho these Contrivers may be allowed some Apology,

Ad Lectorem.

Apology, considering the late Revolution through the Misfortunes of an unfortunate Monarch (the only Terrestrial Deus of their Expectation.) Yet this Kingdom is replenished with other Persons (irreligious, or with Popish Blood in their Veins) that sow the Seed of Sedition, and spread their Maledictions about the Nation, especially in the City of London, invidiously reflecting on the present Government and Conduct of Publick Affairs among all flexible credulous Persons, thinking themselves wiser and of juster Principles, and that they have greater Care for the Preservation of the Church of England, and the Rights, Liberties, and Properties of the Kingdom than the GREAT REPRESENTATIVE of the Nation, who wholly committed the Sovereignty and Regency of Affairs, as likewise the Imperial Crown of the Realm to so good and glorious a PRINCE (the only Instrument under God of securing our Religion, restoring our Liberties, and reviving our Laws) whose Auspicious Reign (being thus seated on the Throne) together with his truly vertuous Consort's, will render this Kingdom (lately in such a Labyrinth) happy and prosperous: which is the earnest and incessant desire of him that assiduouly beseeches the Almighty and Omnipotent God to bless and protect their Majesties of great Britain KING WILLIAM and QUEEN MARY, and make them victorious over all their Enemies, as also the rest of the Royal Family.

I am their Majesties

Most Obedient Subject,

From the sign of the
Globe in Arundel-
street in the Strand,
July 3. 1689.

and my Reader's Servant,

WOODWARD.

WOODWARD.

His Temporibus nec vitia nostra,
Nec remedia pari possumus.

A Table of the *Moon's* Rising and Setting in Hours and Minutes the first six Months of the Year 1690, viz. from the Change to the Full her Setting, and from the Full to the Change her Rising.

By this Table, and the help of Addition, you may compute the Interest of any Sum whatsoever, from a Day to a Year, &c. And for the greater exactness, the Penny is divided into a 100 parts, so that 25 parts are a Farthing, &c. This Table is for the Premises being well considered) it needs no Example.

Pecunia obediunt omnia.

The old is past, another Year's begun,
 Here let us look before we take our Run:
 Time every Season gives our Glass a Shake,
 But few run out, some crack, and others break.
 God send us Peace, and grant us Liberty;
 All curs'd Advice of Jesuits we defy.

Observations.

Δόξα καὶ Ἐμπνεύσει

As the Stars are the Monitors of the *Macrocosm*, or greater World, so they advertise and admonish the *Microcosm*, or little World, Man, either for Good or Evil, that he may be capable of receiving it according as the Divine Providence, or the Eternal Wisdom of the Almighty is pleased to dispense their glorious Influence. *England* is yet under the famous Effects of the late *Triple Conjunction* of *Saturn* and *Jupiter* in the singly Sign *Leo*, the almost only *Prodromus* of the many Overtures and grand Transactions of *Europe*, and as 'twas celebrated in *Trine* to our *Horoscope*, it denoted that this Nation should speed the best of any in *Christendom*, considering the many Jesuitical Contrivances within its Territories to subvert the Government. Therefore if we live free from Animosities and Divisions amongst our selves, no People can be happier. But the Lord has a great Work to do.

February hath XXVIII Day.

Free from all pinching Cares and publick Srife
 Lead we contentedly an honest Life.
 Nothing more sweet than well-deserved Bread,
 It neither choaks the Heart nor clogs the Head:
 It courts no Smile, nor fears a peevish Frown;
 A Calm it brings us, in a stormy Town.

Observations.

Sapiens dominabitur Astris.

Altho the Stars have an Influence on all Persons and things sublunary, yet as we are Englishmen and Christians, let us live so after the Dictates of the Divine Will, that the Stars may have no Power over us, as to Evil; for they only incline, not compel. Besides, we inhabit a Land that flows with Milk and Honey, are govern'd by a glorious Monarch and his Consort of our own Religion, have the blessed Gospel flourishing more than in any Kingdom of Europe, just Laws to punish Offenders; wherefore if we live not in Tranquillity or Union one with another, can we expect any thing but the great Indignation of Heaven, by provoking God's severe Displeasure against us for our Treachery and back-sliding. But Thanks be to God we have a prospect of so well-settled a Government, that Popish Contrivers shall not have Power to alter for the future.

March hath XXXI Days.

What more tempestuous than a Rebel's Breast,
That hates the very sense and name of Rest?
Lives in a Savage Hurricane of Noise,
Contemner of Divine and Human Laws.

A Slave, that like a Top is whipp'd about;
The Devil huffs within, and he without.

Observations.

This Month of *March* produceth a great many Configurations, and most of them of a benevolent Nature. Considering the Season this will be an active Month in most parts of *Europe*, the Stars are all direct in Motion, and denote as direct Affairs in the Courts of Princes, only the Court of *France* excepted. Good News arrives for some of our Merchants from several parts. Great are the Preparations for the Maritime, or Sea-Affairs, and as great Endeavours are carrying on by some Persons for a Cessation of Arms, but they are not to be minded till beaten into better Manners. Some Parts of *Europe* have been too long deluded with fair Pretences. Things Legal as well as Ecclesiastical appear in a prosperous posture. God keep the City of *London* from Fires and intestine Broils, and *England* from *Papish* Conspiracies, then we shall be happy. God preserve us from the *Plague*.

April hath XXX Days.

E'en let him huff, a Bubble soon expires,
Confusion is the Fruit of his Desires:
Profit and Pleasure he proposes first,
His Duty, like himself, is always curs'd:
But when he means to satiate his Hope,
Oft finds himself in Fetters or a Rope.

[illegible]

April, 1678. dnd. y. 12.

First quarter 6 day, at 3 Morning.
Full Moon 13 day, at 1 Afternoon.
Last quarter 21 day, at 4 Afternoon.
New Moon 28 day, at 7 Afternoon.

D.	☉ rise	☉ set.
1	6 21	6 39
6	5 10	6 50
11	4 58	7 2
16	4 50	7 10
21	4 40	7 20
26	4 31	7 29

Observations.

The Benevolent Configurations of the last Month will have some Operation in this. The *Quartile* of Mars and Mercury at the beginning, puts ill People upon ill things; the High-ways are molested with Robbers, and the Sea with Pirates, and the lawful Coin of the Kingdom is abused by Clippers and such like Persons, but time (yea and a little too) will discover both Actions and Actors in order to their deserved Punishment. The Reformed Religion of the Church of England flourishes; but the Religion of Rome appears in her declining Age. England wears the Flag on the Main-top, notwithstanding the Pope and all Endeavours of the French King. Several Aged Persons dy, some suddenly, others that have lingered under Chronick Diseases. His British Majesty is presented with many Addresses. The Citizens of London are active instead of studying the Affairs of State, they are now employ'd in their Shops.

May hath XXXV Days

The Just and Honest feel their Comfort most,
 Who scorn to swill themselves at others Cost,
 But labour for their own, and wisely live,
 Which is a good compendious way to thrive;
 They make no Factions, feel no Storms within,
 Because they steer by Vertue, not by Sin.

Observations.

May affords us several amicable Configurations, God grant they may have as friendly Effects; but the Opposition of Saturn and Mercury from fixed Signs will produce some evil Effects. 'Tis a mischievous Month, but by it we shall discover our Enemies, with much Fraud and Deceit, even among pretended Friends, Robberies, Thefts, and ungrateful Murmurings against Superiors, and the like. But this is nothing, our Kingdom prospers notwithstanding; the Sextile of Jove in Aries to Sol in Gemini gives us glorious hopes of a flourishing Nation, Justice and Equity are habited in their proper Colours, our Religion is secured, our Libraries are restored, and our Laws are revived; Men enjoy their Health, and the Earth brings forth her fruits in due season. Great Honours are conferred on deserving Persons Persons, our KING sits easy on his Throne, and all good People are mightily united to him and his three vertuous Consort.

June hath XXX Days!

So may we steer our Course, that we may have
 An easy House and a contented Grave.
 Peace is no Burthen to a settled Mind,
 But the best Purchase in the end we find.
 Whilst restless Men run head-long on to Breath,
 The peaceful, full of Peace resign their Death.

Observations.

This Month of *June* is usually a time of much Action, especially in active Times; but this will not produce such shedding of Blood as the three succeeding Months *July, August, and September*. Both *Holland and England* are very industrious in preserving their Territories and publick Negotiations, which will be advantageous to the Trade of both those Nations, and as detrimental to the Pride of *France*. The Souldiers in most Countries are in a good esteem with their Commanders: The *English* both by Sea and Land behave themselves courageously. The 19th day produceth a *Quartile* of *Saturn* and *Mars*, 'tis a pernicious Configuration, and signifies much Mischief and many Troubles to the Places under the Signs *Leo* and *Scorpio*. The *French* Monarch will have a share of it's Influence, it menaces a diminution of his Honour, Substance and Dominions, with Indisposition both of Body and Mind. *Rome* also participate. God preserve us from the *Plague*.

April hath XX Days

E'en let him huff, a Bubble soon expires,
Confusion is the Fruit of his Desires:
Profit and Pleasure he proposes first,
His Dury, like himself, is always curs'd:
But when he means to satiate his Hope,
Oft finds himself in Fetters or a Rope.

[illegible]

Observations.

The Benevolent Configurations of the last Month will have some Operation in this. The *Quartile* of Mars and Mercury at the beginning, puts ill People upon ill things; the High-ways are molested with Robbers, and the Sea with Pirates, and the lawful Coin of the Kingdom is abused by Clippers and such like Persons, but time (yea and a little too) will discover both Actions and Actors in order to their deserved Punishment. The Reformed Religion of the Church of England flourishes; but the Religion of Rome appears in her declining Age. England wears the Flag on the Main-top, notwithstanding the Pope and all Endeavours of the French King. Several Aged Persons dy, some suddenly, others that have lingered under Chronick Diseases. His British Majesty is presented with many Addresses. The Citizens of London are active instead of studying the Affairs of State, they are now imploy'd in their Shops.

May hath XXXV Days

The Just and Honest feel their Comfort most,
 Who scorn to swill themselves at others Cost,
 But labour for their own, and wisely live,
 Which is a good compendious way to thrive ;
 They make no Factions, feel no Storms within,
 Because they steer by Vertue, not by Sin.

Observations.

This Month of *June* is usually a time of much Action, especially in active Times; but this will not produce such shedding of Blood as the three succeeding Months *July, August, and September*. Both *Holland and England* are very industrious in preserving their Territories and publick Negotiations, which will be advantageous to the Trade of both those Nations, and as detrimental to the Pride of *France*. The Souldiers in most Countries are in a good esteem with their Commanders: The *English* both by Sea and Land behave themselves courageously. The 19th day produceth a *Quartile* of *Saturn* and *Mars*, 'tis a pernicious Configuration, and signifies much Mischief and many Troubles to the Places under the Signs *Leo* and *Scorpio*. The *French* Monarch will have a share of it's Influence, it menaces a diminution of his Honour, Substance and Dominions, with Indisposition both of Body and Mind. *Rome* also participates. God preserve us from the *Plague*.

July hath XXXI Days.

Peaceful and peaceable may we all be,
 Servants to God, and Friends to Monachy,
 Here let's obey in what is truly just,
 There let us put our only Hope and Trust.
 Thus shall we all comply in every thing,
 With fearing God and honouring the King.

Observations.

July affords few Configurations, Matters at present are at a stand, the Pamphleteer wants Employment, let him wait, a little time produces business in abundance relating both to Courts and Camps. Much News arrives from several parts of the *European* Transactions. God direct the Affairs of their Majesties of *Great Britain*, prosper their most Honourable Privy Councillors in all Affairs of Government, and infatuate their Enemies. God grant their *Majesties* the Wisdom of *Solomon*, and the Fortitude of *David*—The Stars denote some Eminent Marriage will be celebrated about this time; they also signify the disappointing a famous Mistress of her Gallant. *France* is full of Inemploy both by Sea and Land, her Dominions or some of her Territories are in great danger of an Invasion, perhaps her King may repent his invading *Ireland*, and maintaining his Popish Cause there.

August hath XXXI Days.

If we were Kings we then might rule and sway;
But as we Subjects are, we must obey.

To God and Man Obedience is due,
Who scorns the one, will scorn the other too.

A Monarch's Counsel falls not in our Sphere,
Our Gloss and Comment should be Love and Fear.

16	5	6	6	54
21	5	16	6	44
26	5	26	6	34

Observations.

Most of *August's* Configurations are benevolent, which will in part lessen the Fury of the People, and prevent the great Effusion of Blood that was denoted by the Stars in some of the preceeding Months. Some Eminent Gownman or Lawyer either dies, or suffers great Aspersions; In the interim you may hear of the Publication of some scurrilous Papers or Pamphlets, aspersing and scandalizing our Superiors and those in Authority over us, but time will discover the Authors, *Stulti nunquam sapiunt, nisi in angustiis*——. The 24th in the Morning the *Sun* suffers an Eclipse in the Cœlestial Sign *Virgo*, the Ascendant of France; the Eclipse will be great, but invisible here, which (with other things of greater consequence, known by her Monarch's Nativity, and Causes concomitant) multiplies that Kingdoms Calamities. His most Christian Majesty labours under an ill Fate, of which he'll be sensible before the termination of this Year 1690. B 4

September hath XXX Days.

Long may Religion flourish and the Crown;

They always stand together, or fall down.

Alike they prosper, and alike they die;

Both fight for one another's Royalty :

And they who quarrel against either Cause,

Shew not their Subjects Hands, but Vultures Claws.

[illegible]

Observations.

This Month affords us not one good Configuration; the 8th day produceth an invisible *Eclipse* of the *Moon* in the sign *Pisces*; the *Opposition* of *Jove* and *Mars* does much concern the Affairs of *England*, but the Effects thereof will be of worse Consequence to some other Parts of *Europe*, subjected to the Signs *Aries* and *Libra*: Neither is the *Opposition* of *Jove* and *Sol* of less Efficacy in Mundane Affairs. The Month in general will be both troublesome and sickly: Many Officers and Magistrates are menaced with Removals, some to their long-home, others to a worse place. Superiors differ, and the vulgar People complain of hard Usage and Oppression, but not so much in *England* as in other Countries beyond Sea——. 'Twill be a Month of Action in earnest considering the Season both by Sea and Land: therefore good Lord direct us.

October hath XXXI Days.

So desperate Sinners dare blaspheme their God,
Because they serve him not, and hate his Rod,
Dispute their just Allegiance, and defy
The Judgments of the great Divinity;
When they who love his Service and his Law,
Find their Subjection is their greatest Joy.

Observations.

The beginning of this Month will very much participate of the ill Effects of the last; but the *Trine of Jove and Venus* will infinitely frustrate the evil Portents; some of the Stars wound us, the others give us Balsam, and thus the *Rota* of Fortune goes round, sometimes they smile, and sometimes they lower, even as it best pleaseth the Hand of Providence—. But the aforesaid *Trine* is a most friendly Configuration, and will, 'tis hoped, have as friendly Effects on all things sublunary, as well Vegetable as Animal. The Stars denote some famous Marriage, possibly the Consequence thereof may be happy for this Nation. Good News arrives for our Merchants of the safe Returns of their adventur'd Effects, notwithstanding their late dangers by ill Weather; as for other News there is but little stirring, only of the Publication of some seditious Pamphlet or ill Papers, that will, 'tis doubt, disturb the People.

November hath XXX Days.

But he that swells with unopposed Pride,
Swimming and tugging in a rugged Tide,
Soaring and towering to a frantic height,
Till every common Rode be out of sight;
Is past the reach of any vulgar Tie,
He makes his Will above his Destiny.

Observations.

November affords us many Configurations both good and bad, the most pernicious and destructive to the Affairs and Sanity of Mankind is the pestiferous Conjunction of Saturn and Mars in the treacherous Sign Scorpio. God grant that this Conjunction be not the Πεδεζμ of some very mortal Epidemical Distemper the following Summer; for such a Conjunction preceded the Sweating Sickness, Anno 1485. But the good Configurations which the Month produceth, especially towards the end, will incline the Hearts of Men to both Peace and Unity in most parts of Europe. The great Differences and Distractions of some Foreign Nations are in a fair way of being composed; so that in all probability the Year may be concluded with much more Union, than was some Months since expected, to a general Satisfaction of Men in all Stations and Capacities, as well in England as in other European Countries.

December hath XXXI Days.

Well let him soar upon his highest strain.
 Batter'd by Tempests, Thunder, Hail and Rain,
 He ignominiously at last will fall,
 Unperturb'd, unlamented, curs'd by all.

Whilst I with much Fervency sit and sing
 The Glories of KING WILLIAM and his QUEEN.

Observations.

The Cœlestial Wonderers are all direct in Motion, and so they will be all this Month, but here are but few Configurations: as 'tis a time of little Action on Earth, so in the Heavens among the glorious Stars, yet Nature has no Vacuum, nor was ever known to be idle. The *Quartile* of the *Sun* and *Jove* denotes Contentions and Grumblings about some Ecclesiastical Affairs, or Matters of Faith. As for other Matters they seem secure, the Stars denote Serenity. The Ingress of *Jove* into *Aries* promises well for *England*, with Safety to her People, which is the supream Law, *Ergo*, whoever endeavours Dissentions among the People to frustrate Allegiance to their Majesties, becomes guilty of a cursed Crime.

Πάντοτε δὲ ζα Θεῷ.

Of Astrological Characters.

1. ♈ Aries, Head and Face. ♎ Libra, Reins and Loyns.
 ♉ Taurus, Neck and Throat. ♏ Scorpio, Secret Members.
 ♊ Gemini, Arms & Shoulders. ♐ Sagittarius, the Thighs.
 ♋ Cancer, Breast & Stomach. ♑ Capricornus, the Knees.
 ♌ Leo, Heart and Back. ♒ Aquarius, the Legs.
 ♍ Virgo, Bowels and Belly. ♓ Pisces, the Feet.
2. Every one of these Signs are divided into 30 degrees, every degree into 60 minutes, and every minute into 60 seconds, &c.
3. The first 6 Signs are said to be Northern and commanding, the last 6 Signs Southern and Obeying, being opposite to each other, as ♈ to ♎, ♉ to ♏, and on the contrary.
4. The Aspects are in number Five, to wit, ♈ Conjunction, * Sextile, □ Quartile, △ Trine, ♈ Opposition.
5. The Nature of the Conjunction is good with good Planets, and evil with evil.
6. Planets are said to be in Conjunction, when they are in the same Sign and Degree.

Of Astrological Characters.

'Tis true, this cannot properly be called an Aspect, yet as Unity in Number, Point in Geometry, or Sound in Musick, so this may be accounted; for from this other Aspects proceed.

7. The *Sextile* is, When Planets are two Signs or 60 Degrees distant from each other, and is a good Aspect.

8. The *Quartile* is, when Planets are in 3 Signs or 90 Degrees distant from each other; and is a bad Aspect.

9. The *Trine* is, when Planets are four Signs or 120 Degrees from each other; and this is the best of all Aspects.

10. The *Opposition* is, when planets are distant 6 Signs or 180 Degrees from each other; this is Diametrical, and the worst of all Aspects whatsoever.

11. Aspects are either Sinister or Dexter.

12. A sinister Aspect is according to the Succession of Signs, a Dexter the contrary, *Verbi gratia*. A planet in ♈ casts his * Sinister to ♊, but his * Dexter to ♋.

13. Again, Aspects are either Partile or Platick.

14. A Partile Aspect is, when both the Planets or Stars are in the same degree and minute of any Sign. So ♄ in ♈ 19, is in partile * Aspect to ♀ in ♊ 19.

15. A Platick Aspect is, when Planets behold each other some Degrees or Minutes from a true Aspect.

16. The Planets are in number Seaven, to wit, ♄ Saturn, ♃ Jupiter, ♂ Mars, ☉ Sol, ♀ Venus, ☿ Mercury, ☾ Luna; to which may be added ☊ Tellus, the Earth.

17. Saturn and Mars are Infortunes, and evil Planets, Jupiter and Venus Fortunes, and good; the rest indifferent.

18. Saturn, Jupiter, Mars, Sol, are Masculine Planets; Venus, and the Moon, Feminine; Mercury either, as he is joyn'd.

19. Saturn is cold and dry, Jupiter hot and moist, Venus and Luna cold and moist, Mercury according as he is joyn'd.

20. The Nodes of greatest Note are ♋, viz. ☊ Caput Draconis, ☋ Cauda Draconis, ☊ Sors, the Fortune or Chance.

He that rightly Comprehends what is here delivered, will be able to understand any Astrological Treatise, and by a little Diligence may soon arrive to a competent Stock of Knowledge in Astrology.

An easie and useful Table, shewing how many Years Purchase a Lease, or Annuity, to endure for any term of Years under 33, is worth presently at Interest upon Interest, at 6 in the Hundred; and shewing plainly how to discount any Lease in being, and the true value of the Reversion after any number of Years.

The Explanation of this Table.			
Years of a Lease.	Years.	Months.	Dec. par.
1	0	11	0
2	1	9	9
3	2	8	1
4	3	5	9
5	4	2	5
6	4	11	0
7	5	7	0
8	6	2	5
9	6	9	6
10	7	4	3
11	7	10	7
12	8	4	6
13	8	10	3
14	9	3	6
15	9	8	5
16	10	1	3
The first Column towards the left hand, shews the Years of a Lease or Annuity, & right against each Year, are the Years, Months, and Decimal parts of a Month's Purchase that such a Lease is worth.			
As for Example.			
Suppose a Lease or Annuity to continue 10 Years, and you would know how many Years Purchase it is worth in present Mony; look in the Table for 10 Years of a Lease to the left hand, and against the same you will find 7, 4, 3. which shews that your Lease of 10 Years, is worth 7 Years, 4 Months and 3 10th parts of a Months purchase.			
Years of a Lease.	Years.	Months.	Dec. par.
17	10	5	8
18	10	9	9
19	11	1	3
20	11	5	7
21	11	2	3
22	12	0	5
23	12	3	6
24	12	6	6
25	12	9	4
26	13	0	0
27	13	2	5
28	13	4	9
29	13	7	1
30	13	9	2
31	13	11	1
32	14	1	2

Again, if you were to take or buy the Reversion of any Lease or Annuity, work thus. Suppose the Lease to be thirty Years in all, you shall find in the second Table, and right hand, against 30, 13 Years, 9 Months, and 2 tenth parts of a Months Purchase; this it were worth were it in present Possession. But suppose there be a Lease of 5 Years (more or less) before you Commence, look in the Table against 5 Years, and there you shall find 4 Years, 2 Months, and 3 tenth Parts, (or half a Months Purchase); subtract this out of the Sum against 30, which is 13, 0, 2 less by 4, 2 5. The Residue after Subtraction is 9 Years, 6 Months, 7 tenth parts of a Month; and so much is the Reversion after 5 Years worth the Remainder of 30.

Verba importat Hermodorus?

The

A Table, shewing upon what Point of the *Aequator* the Moon makes a full Sea in any of the undernamed Places; with the Hours and Minutes to be added to her Southing for obtaining the true Time thereof.

Here.

Here follows the Use of the foregoing Tide-Table, viz. how it's to be used with the Moons Southing, whereby it may be made plain, especially to all those whose Employments chiefly depend on the S E A S.

Suppose that you desire to know what time it will be *High-Water* at *Bristol* the 14th. of *Jan.* 1690. (it being already performed on the Right-hand Page and 8th. Column of the *Kalender* for every day this Year at *London*) I turn back to the Table of the *Moons* Southing (for through every Month in that Table the *Moons* Southing is inserted) where against the 14th. of *January*, 1690. I find 3 hours 3 minutes, A. which is the precise time of the *Moons* coming to the South in the Longitude of *London* : Then in the Table on the back-side of this Leaf against *Bristol*, &c. I find 6 hours 45 minutes, which (as the Title directs) being added to 3 hours 2 minutes (the *Moons* Southing), makes 9 hours 47 minutes. So that I conclude 'tis *High-Water* at *Bristol* 47 minutes past 9 of the Clock at Night, the 4th. of *Jan.* 1690. *Et sic in aliis*. But if the Sum of the two former Numbers had exceeded 12 hours, you must have subducted 12 hours therefrom, and the residue had been the time desired.

Where Note, That the Tide floweth one Point of the Compass more at the Spring-Tides (which are the New and Full Moons) than at the Neap-Tides (which are the first and second Quarters.) As also Land-Floods and boisterous Winds may cause some Variation, but this is the exactest Rule that can be given, in regard the *Moons* Southing is Calculated with Latitude.

To gain the Hour and Minute of the Night by a *Sun-Dyal*, observe this Order, When the Moon shines, see how many hours and minutes the Shadow wants of the Line 12, which subtracted from the *Moons* Southing, leaves the time of the Night; but if the Shadow falls past the 12th. Line, add the hour and minute to the hour and minute of the *Moons* Southing, the Sum is the Hour and Minute of the Night desired. *This may prove Delightful.*

*Both Time, and Tides, pass swift away,
And will for no Man's Leasure stay.*

Fugit Hora, sine Mora,

Of

OBSERVATIONS, 1690.

Of the ECLIPSES of the Luminaries, happening this present YEAR.

I. According to our *English Ephemerides*, there will happen in the Revolution of this Year four *Eclipses*, two of the glorious *Sun*, and as many of the erratick *Moon*, which will be Celebrated as follows.

II. The first will be an *Eclipse* of the *Sun*, the 28th. day of *February*, about Eleven of the Clock at Night, in 22 degrees of the Cælestial Sign *Pisces*. This will be an Invisible *Eclipse* to us in *England*, but to our *Antipodes* the *Sun* will be above half darkened, for it falls near their Meridian. *Eclipses Luminarium maximè agunt in illas regiones, quæ sunt sub signo Ecliptico.*

III. The second will be an *Eclipse* of the *Moon*, *March* the 14th. about Ten of the Clock at Night, Celebrated in 5 degrees of the Cælestial *Balance*, and Visible if the Air be clear, to us in *England*.

IV. The third will be the second *Eclipse* of the *Sun*, the 24 day of *August*, about One of the Clock in the Mornings, in 11 degrees of the Sign *Virgo*. It will be a great *Eclipse*, near 8 parts of the *Sun's* Body will be Obscured, but not Visible to our *English* Inhabitants, therefore, *Nil nocet Eclipsi illis regionibus, in quibus non videtur.*

V. The fourth and last will be the second *Eclipse* of the *Moon*, *September* the 8th. in 26 degrees of the Sign *Pisces*, about Two of the Clock in the Afternoon, but Invisible to us in *England*, because the *Moon* at the Celebration will be beneath our Horizon. *Interceptio solaris profecta luminis ex interpositione Lunæ inter solem atque aspectum Nostrum.*

For Conclusion, That as I am an *Astrological Professor*, and a *Practitioner* in its several Parts; so I dare undertake to teach the same to any that desire to understand it: To wit,

I. The *Pars horaria*, the Method of Resolving Questions: As Life, whether long or short? Rich or Poor? What Part
of

OBSERVATIONS, 1690.

of the life is like to be most prosperous? Or any other legal Demand, whose Solution is contain'd within the Perimeter of this Sublime Physicall Science.

II. *Pars Genethliaca*, the manner of *Rectifying*, *Directing* and passing Judgement on *Nativities*, discovering the most Remarkable Accidents that may happen during the Race of Man's life. Also how to Calculate the Longitude, Latitude, Declination and Ascension of the Planets.

III. The *Pars Mundana*, how to Calculate and Judge an Annual Revolution, *Compass Monthly Observations*, the Calculation of *Eclipses*, past or to come, and to give the Signification of the same; with the Portents of *Comets*, Eminent Configurations of the Cælestial Bodies, Rising, Southing and Setting of the *Moon*, or any of the *Wandering Stars*, as also the Use of the *Globes*.

Quid enim pulchrius excogitari potest, quam præclara Mundi Machina, Laudabile Dei opus? Quid decentius ordine illi Corporum & rerum omnium, quem Deus illis imperavit, & in æternum servandum dedit.

IV. Lastly, As to *Physick*; I have Medicaments ready prepared and fitted for the Cure of several Diseases cureable, incident to the Bodies of *Men*, *Women* and *Children*.

I. My *Balsamick Pills*, which are intallibly good in the Cure of the *SCURVY*, *Dropsie*, *Head-aches*, *Melancholly*, *Sleepy-Evil*, *Giddiness in the Head*, *Dullness of Hearing*, *Dimness of Sight*, *Jaundies*, *Agues*, *sore Eyes*, *stinking Breath*, *want of Appetite*, *Green-sickness*, *Pains in the Stomach*, *Liver*, *Spleen*, *Gripings in Breast*, *Bowels or Joynts*, open *Obstructions* of both *Reins* and *Bladder*, help *Barrenness* and *fits of the Mother*, quicken the Senses, clear the Sight, add a good colour to the Face, and make the Body able to withstand *Diseases*, purifie, cleanse and sweeten the *Blood*, resist *Putrefaction* and *Corruption* of the *Humours* thence proceeding afflicting the *Head*, *Liver*, *Spleen*, *Gall*, *Stomach*, *Reins*, *Bladder*, *Joynts*. In a word, these *Pills* are a cheap, safe, easie, and approved help for most Diseases happening to Man, Woman or Child, (where Purging is required) as Hundreds can testify; They are also excellent to Purge the Body after *Sickness* or *Excessive Drinking*, or before letting of *Blood*; and for such to take

OBSERVATIONS, 1690.

take that Drink either *Tunbridge, Epsom, Iffington*, or other Waters; They have often times Cured in a Month, three Weeks, yea, in Fourteen Days time, and sometimes in less, very deplorable Diseases: Price of the Whole-Box Three Shilling, of the Half-Box Eighteen-Pence; with Printed Directions.

II. My *Elixir Saluris* has been experienced many Years an Excellent *Cordial-Drink*, and so Analogous to the Humane Frame, that it effects its Operation as Nature is dispos'd for action. And for those that cannot take *Pills*, I publish this *Elixir*; it has been given to Young and Old, and prov'd it self successful in the Cure of the following Distempers, to wit, the *Cholick*, Gripping in the Guts, *Scurvy*, Shortness of Breath, Coughs, Surfeits, Dropsie, Bad-Digestions, Vapours from the Spleen, &c. Besides, this *Cordial* revives Drooping-Melancholly Spirits, removes Pains from the Heart and Stomach, Wind and Crudities, causes Appetite and Cleanses the Body after Sicknes and Drinking of the Waters; 'twill retain its Vertues several Years; 'Tis Sealed up in Half-Pint-Bottles, The Price of each is Two Shillings Six-Pence; with Directions of its Use.

III. My *Oyntment* for the Worms, which destroys them in Old and Young; Physicians are of Opinion, That these Vermine shorten more Peoples lives than the Sword or Plague, for they cause many Diseases, as the *Vertigo*, *Megrim*, *Rickets*, *Falling-Sickness*, *Consumptions*, *Fevers*, *Convulsion-Fits*, &c. Many are afflicted with the Worms and yet know not of it; some are tormented with them from the Cradle to the Grave. Besides destroying of the Worms, the *Oyntment* opens Obstructions of the Stomack, causes Appetite, strengthens the Brain, and hath been (*sub Deo*) instrumental to preserve Thousands. You may have of it from One Shillings worth to what Quantity you please, with Directions, in Print of its Use.

IV. My *Pills*, only prepared for the Cure of CLAPS, French POX, Running of the REINS, and their Symptoms, as Pains in the Head, Shoulders, Arms, Shin-bones, Heat and Scalding of Urine, Pricking-pains in making Water, Swenest or Swelling in the Throat or Groin, hard Pustles or Blisters in the Head, Neck, Face, Whitish, Yellowish, Greenish or Blewish Matter issuing from the Privy-parts. With these Pills, my *Diet-Drinks* and other Antidotes

OBSERVATIONS, 1690.

Antidotes against the *P O X*, many persons have been Cured; but the *Pills* have Cured many without taking either *Diet-Drinks* or Antidotes. If been trading with any unclean person, take of these *Pills* in time, they prevent as well as Cure: price 2 s. the Box; with *Directions*.

Qui Medicè vivit, sine Medicis diu vivet: Qui non Medicè vivit, cum Medicis saepe, sed non diu Erit.

My Hours are from Ten in the Morning, till Seven at Night.

From the Globe in Arandel-Street,
in the Strand, June 8. 1689.

D. WOODWARD.
